

## Consumption Takes 350 People Every Day

in the United States and the surprising truth is that most cases are preventable with timely, intelligent treatment.

These appalling facts should warn us that after sickness, colds, overwork or any other drains upon strength, Scott's Emulsion should be promptly and regularly used because tubercular germs thrive only in a weakened system.

The tested and proven value of Scott's Emulsion is recognized by the greatest specialists because its medical nourishment assimilates quickly to build healthy tissue; aids in the development of active, life-sustaining blood corpuscles; strengthens the lungs and builds physical force without reaction. Scott's Emulsion is used in tuberculous camps because of its rare body-building, blood-making properties and because it contains no alcohol or habit-forming drug. Be sure to insist on Scott's.

Scott & Bowne, Bloomfield, N. J. 13-76

## Middlebury Register

A Timmouth man has just paid about two hundred dollars apiece for five registered Holstein cows. This is another fairly good illustration of the way the dairying interests of Rutland county are being highly developed.—Rutland News.

In acknowledgment of the bravery of her firemen, New York City has erected a memorial monument at 100th Street and Riverside Drive which is at once an appreciation of the heroic sacrifice made by those men who died at the post of duty, and an inspiration to those members of the department, "Soldiers in a war that never ends," in whose instant response to the alarm the confidence of a whole city rests.—November Popular Mechanics Magazine.

An automatic mail-exchange system, to take the place of the old catcher arm used on mail cars to pick up mail sacks while going through stations at high speed, has recently been invented and tested in various parts of the country says the Popular Mechanics Magazine. It not only picks up any number of the largest mail sacks without damaging their contents, but deposits other bags gently in a trough beside the track. The entire operation is automatic and requires no attention from the mail clerks in the car. With this mail-exchange system a train could run from New York to San Francisco without a stop except for coal and water, and the postal cars could be loaded and unloaded at every station without the mail clerks going near the doors.

Two persons were killed Monday at Malden, Mass., and another badly injured from taking hold of wires blown down by a storm. During the coming six months there is sure to be a lot of wind and storm in this part of the world and it is inevitable that wires get blown down and tangled up with another. It is impossible to tell what wires are innocent and what are dangerous. There are enough high tension circuits in all sections of the country so that any displaced wire may come in contact and be dangerously charged. The only safe thing is to let wires alone and children should be taught and warned not to touch any wires that they may find dangling in reach. Older people when they find wires out of place should notify the telephone or electric light company. Both are interested as wires are so easily crossed that what affects one is likely to be the other. It is much better to be over careful in this matter than to risk death or serious injury.—Bennington Banner.

## Waste from Desks Goes into Brushes.

Waste wood in the manufacture of school desks is now being used for the backs of cheap brushes, according to the statement of the forest service.

A large manufacturer of school desks in Michigan had a considerable amount of waste material in sizes which were too short to enter into the manufacture of the small desks, and could not be utilized further with his machinery or in his line of work. This material was all hard maple in pieces an inch thick, a foot or so long, and about three inches wide; for a long time it had been consigned to the waste pile and sold as firewood. This waste amounted to from one thousand to fifteen hundred board feet each day. A nearby manufacturer was using practically this quantity of maple, which he was sawing up into small pieces for making the backs of cheap brushes.

Members of the forest service, investigating methods of eliminating factory waste, conceived the idea that the blocks used by the brush factory could be readily secured from the waste of the school desk manufacturer, and on

this basis got the two together. Arrangements were made so that the brush manufacturer now places orders with the other firm for its raw material and what was formerly waste is now a source of profit.

## Wooden Shoes Made in the United States.

In this country beech is the favorite material for wooden shoes, the manufacture of which has reached considerable proportions in the United States, according to the department of agriculture, which has just issued a bulletin on the use of the wood. These shoes, the department says, cost from 60 to 75 cents a pair and are good for two years. They are worn by those who have to work in cold or wet places, such as tanneries, breweries, and livery stables, and by workmen in steel mills and glass factories who must walk on hot grates or floors. Farmers, too, are classed among the users.

Beech wood is put to a very much wider range of uses than the average person would be likely to suspect. The department says beech enters into hundreds of articles from hobbyhorse rockers to butchers' blocks. We walk on beech floors, eat off beech picnic plates, carry beech baskets, play with beech toys, sit on beech chairs, and in dozens of other ways use articles made of beech almost every day of our lives. Its freedom from taste fits the wood especially for articles which come in contact with foodstuffs, and beech meat boards, skewers, lard tubs, butter boxes, sugar hogsheads, refrigerators, dishes, spoons, and scoops are widely used.

Only one species of beech grows naturally in the United States, but few trees in this country have a wider commercial range. It extends from the Gulf of Mexico into eastern Canada, and in practically every place where it grows it is cut for market. The total yearly output of beech wood in the United States is approximately 500 million board feet.

## Daughters American Revolution.

Ethan Allen chapter, D. A. R., was very pleasantly entertained at the home of Mrs. Raymond McFarland, secretary of the chapter, on the afternoon of October 17th, celebrating Yorktown day. Mrs. Sarah Wainwright and Mrs. David Corkran entertained and assisted the hostess.

Over thirty members were present and several invited guests. The meeting was called to order by the regent, Mrs. Brewster, and the regular routine business transacted. New by-laws of the order were read by Mrs. Thomas Boyce, who will represent the chapter at the state convention held at Brattleboro October 22.

Miss Rena Huntley and Miss Margaret Sheldon were nominated and voted upon as alternates to attend same. Several new members were reported added to the chapter since its last meeting and two new names for membership proposed and accepted.

An enthusiastic report of the meeting of the Rhoda Farrand chapter, D. A. R., of Addison was given by Mrs. Hagar, who was present as an invited guest.

The literary program opened with a paper by Mrs. Harris, which was omitted from the July meeting on account of limited time. Subject, "Origin of Constitution," (1619-1789), followed by Mrs. McGilton on "How the Constitution Became the Supreme Law of the Land," (1783-1870). Both papers were fine productions, showed deep research, very instructive and fine intellectual efforts.

Two piano solos were rendered in a very artistic manner by Miss Rena Huntley, she responding to an encore. Delicious refreshments were then served and the usual social hour enjoyed before the guests dispersed, calling it a delightful occasion.

J. L. W., Historian.

## Greater Vermont Notes.

The Sterling section of the Green Mountain club is showing great activity. Its members have completed the link of the long trail from the northern peak of Sterling mountain to Sterling pond. A. W. Stone, president of the section, recently took 18 boys from Johnson over Sterling to Barnes camp, returning by way of Jeffersonville. Rev. F. W. Hazen, secretary of the section, has led a party of 10 boys and 24 girls to the summit of Sterling, the latter part of the ascent being made in the rain, with true Vermont pluck.

The Bennington County Vermont Improvement association issued on October 1 the first number of its monthly publication, The Bennington County Review. This official organ of the association, designed to be a magazine rather than a newspaper, will reflect the aims, policies, and achievements of the association. Reaching the entire county, it will seek to develop a "County-community-spirit," its object being suggested by the legend, "For a Greater Bennington County."

## A Gentle and Effective Laxative.

A mild, gentle and effective laxative is what people demand when suffering from constipation. Thousands swear by Dr. King's New Life Pills. Hugh Tallman, of San Antonio, Tex., writes: "They are, beyond question, the best pills my wife and I have ever taken." They never cause pain. Price 50c, at druggists, or by mail, H. E. Bucklen & Co., Philadelphia or St. Louis.

## LAKE SHORE SCHOOL UNION SHOW.

School Children Exhibit Corn, Johnny Cakes and Gingham Aprons.

Shoreham, October 18. Shortly after eight this morning the town common began to be alive with school children bringing to Academy hall articles which they had made at home for the school union show. The entries were closed at about noon; and the judges began their work immediately after dinner.

Meanwhile about two hundred pupils had congregated, arriving on foot, on horseback, in single teams and double teams. They had their exhibits and dinners with them, and as many of the parents, teachers, and others interested as could come. Twenty of the twenty-nine teachers were on hand through the day and conducted the children's play, entering into the games themselves and seeing that all of the children got into the games. Eight of the teachers brought and displayed upon the walls of the hall exhibits of drawing, writing, and manual work done by their respective schools. No prizes were offered for these exhibits; but they added very materially to the show. During the afternoon pictures were taken of the children who were out at play; and outdoor games were continued until the judges had reached their decisions.

Owing to a bad corn year in this section, only four entries of ten ears were made, four of single ears and one novelty. No entries were made from Bridport or Orwell. The judges of corn were Supt. A. W. Eddy of the Middlebury school union and R. S. Hall of Orwell, a very successful corn grower. In the cooking classes there were six Johnnycakes and ten displays of cooking, the displays averaging about three articles each. In the sewing classes there were six gingham aprons and twenty-five displays of sewing, the displays averaging about three articles each. The judges of the cooking and sewing were Mrs. J. H. Atwood and Mrs. Carl Morse, both of Cornwall.

Three premiums approximating in value a dollar and a half, a dollar, and half a dollar respectively, were awarded to each of the six following classes: (A) ten ears of corn grown on an eight of an acre by a school boy; (B) single ear of corn grown on an eighth of an acre by a school boy; (C) Johnnycake made by a school girl; (D) display of cooking by a school girl; (E) gingham apron made by a school girl; (F) display of sewing by a school girl. The following are the prize winners:

### CLASS A.

Hockey skates, Frank Webster, East Shoreham; boy scout knife, H. Grandy Heitman, Shoreham; jack knife, Harold Farnham.

### CLASS B.

League base ball, H. Grandy Heitman; catcher's mitt, Frank Webster; fielder's mitt, Harold Farnham.

### CLASS C.

Kitchen aluminum set, Pearl Farnham, Shoreham; casserole, Audrey Godette, Shoreham; aluminum basin, Marguerite Munger, Orwell.

### CLASS D.

Casserole, Rena Dundon, Orwell; aluminum cooker, Sabra Hurd, Bridport; griddle cake set, Marjorie Robbins, Shoreham Center.

### CLASS E.

Individual Easter, Gwendolyn Smith, Shoreham; shears, Rosa B. Nickerson, Orwell; hand bag, Anna Godette, Shoreham.

### CLASS F.

Scissors set, Margaret Montbriand, Bridport; waffle irons, Isabelle Hebert, Shoreham; silver thimble, Mary Bennett, Bridport.

Special—baker, Hartwell Ward, Shoreham Center.

We frequently hear it charged against the public school that it does not interest the pupils in things practical; that in rural communities it educates away from the farm, away from the home—away from the home community. The Lake Shore School Union is composed of Bridport, Orwell and Shoreham, three agricultural towns bordering on Lake Champlain. At Shoreham, the middle point of the union, is located an approved high school; and scattered over the one hundred twenty-five square miles of clay country are twenty-eight rural schools. The union superintendent believes that the function of the school is to supplement the education afforded by the home, to awaken a variety of interests in the children and help them to find and develop themselves. He brought the matter of a school union show before the joint board of school directors at their annual meeting in April; and money was appropriated by the boards of the several towns to defray expenses. These schools, which today exhibited displays of curriculum work, have on their rolls the pupils who took premiums on farm and home products. To see the excellent grade of corn grown by the boys, the staples and delicacies cooked by the girls, and their skillful needlework, the various school exhibits, and the joy of the children themselves as they came from the opposite ends of the union, met in organized play, and went away richer in the acquaintances made and the friendships strengthened—to see and comprehend the meaning of all this is to know that the rural school is not educating the boy away from the farm, nor enticing the girl away from the home, but it is making their lives richer and happier in their home community.

## Forest Notes.

Siam exports about nine million dollars worth of teak a year.

Oils distilled from the needles of spruce and fir trees are being used to scent petroleum floor oils which are sometimes objectionable on account of their odors.

The governor of Iowa has set aside a fire-prevention day, urging that the citizens discuss conditions and create a sentiment against forest fires and other conflagrations.

The republic of Colombia is said to have excellent regulations for its national forests. Lumbermen who take cedar and mahogany are required to plant young trees of the same species in the cut-over spaces.

## GOODBYE DANDRUFF

## USE PARISIAN SAGE

If you have dandruff it is because the scalp is too dry and flakes off. Freshen up the scalp—lubricate it—and dandruff disappears.

Surely try a 50c. bottle of Parisian Sage. It cleanses the hair, nourishes it, stops falling hair and itching scalp. It is just what you need to make the scalp healthy and immediately remove dandruff. W. H. Sheldon. adv.

## Estate of George S. Walker

STATE OF VERMONT.

DISTRICT OF ADDISON, ss. { Probate Court  
The Probate Court for the District of Addison,  
To all persons interested in the trust estate of  
George S. Walker, late of Whiting, in said district, deceased. GREETING:

By the authority of the State of Vermont, you are hereby notified to appear before the said Probate Court, at the Probate Office in Middlebury, in said district, on the 15th day of November, A. D. 1913, at 9 o'clock A. M., to show cause, if any you have, why the annual account of Charles O. Church, trustee of the estate of said deceased, should not be allowed.

Dated at Middlebury, in said district, this 21st day of October, A. D. 1913.

Charles L. Burton, Judge of Probate.

## Estate of George R. Langworthy of Middlebury.

Order of Notice to Pay Debts.

STATE OF VERMONT, { Probate Court  
DISTRICT OF ADDISON, ss. {  
The Honorable Probate Court for the district aforesaid.

To the heirs and all persons interested in the estate of George R. Langworthy, late of Middlebury, in said district, deceased. GREETING: Whereas, application hath been made to this court in writing, by the administrator de bonis non with the will annexed, praying for license and authority to sell all or a part of the real estate of said deceased, for the payment of debts and charges of administration, setting forth therein the amount of debts due from said deceased, the charges of administration, and the amount of personal estate and the situation of the real estate. The application asks for license to sell a specified part now and the balance when the heirs desire.

Whereupon, the said court appointed and assigned the 3rd day of November, 1913, at 9 o'clock a. m., at the Probate Office in Middlebury, in said district, to hear and decide upon said application and petition, and ordered public notice thereof to be given to all persons interested therein, by publishing said order, together with the time and place of hearing, three weeks successively in the Middlebury Register, a newspaper which circulates in the neighborhood of these persons interested in said estate, all which publications shall be previous to the day assigned for hearing.

Therefore, you are hereby notified to appear before said court, at the time and place assigned, then and there in said court to make your objections to the granting of such license, if you see cause.

Given under my hand at Middlebury, in said district, this 14th day of October, 1913.

Charles L. Burton, Judge of Probate
